

## TOUCHING THE BODY - TOUCHING THE FEELINGS

Feelings and emotions are expressions of our liveliness. They move our body in response to life. When there's a message from our surroundings that our feelings are not welcome, we use our muscles to hold them in. Sometimes we're not even aware of them anymore. We live detached from ourselves. In this Intensive we will listen to the movement of emotions in the body and explore the Rosen touch as a bridge to our unconscious inner life.

**Roni Mosenson Nelken**, senior teacher, is head of the Israeli Rosen Method Center in Jerusalem. She studied with Marion Rosen and leading senior teachers worldwide and is teaching throughout Europe on a regular basis.

*„When I found this special Rosen touch I had a feeling of coming home. This is the place that I have been longing for - to be who I am in the presence of others and thus allow the other to be that too. It is a deeply human place that enables change and healing.“*

# BODYWORK INTENSIVE
